DETAILED ACTION

Allowable Subject Matter

Claims 1-11 are allowed over prior art.

The following is an examiner's statement of reasons for allowance:

None of the prior art teaches an apparatus or method for non-destructively inspecting materials housed in containers having an x-ray beam emitter oriented to direct an x-ray beam at an angle to a plane perpendicular to a conveying direction, wherein said angle lying in an angle range of 8° to 20° inclusive as claimed in independent claims 1 and 7.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Mazess et al. (US 6449334B1), Springer et al. (US 6453003B1) and Aufrichtig et al. (US 6359961B1) teach x-ray inspection systems with angled beam illumination but fail to teach the claimed range of angles.
